

EZIT Endpoint

ADVANCED PROTECTION FOR SERVERS, DESKTOPS AND LAPTOPS WITH A MANAGED SECURITY SOLUTION

ALWAYS ON SECURITY & THREAT DEFENCE

A combination of advanced endpoint protection software and live agent monitoring provide multiple layers of automated protection.

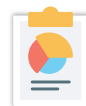

MONTHLY SUBSCRIPTION

Pay one flat monthly fee per device with no long term contracts.

CENTRALLY MANAGED 24/7/365

Network and security specialists manage your endpoints by making updates, improving security posture and responding to detected threats.

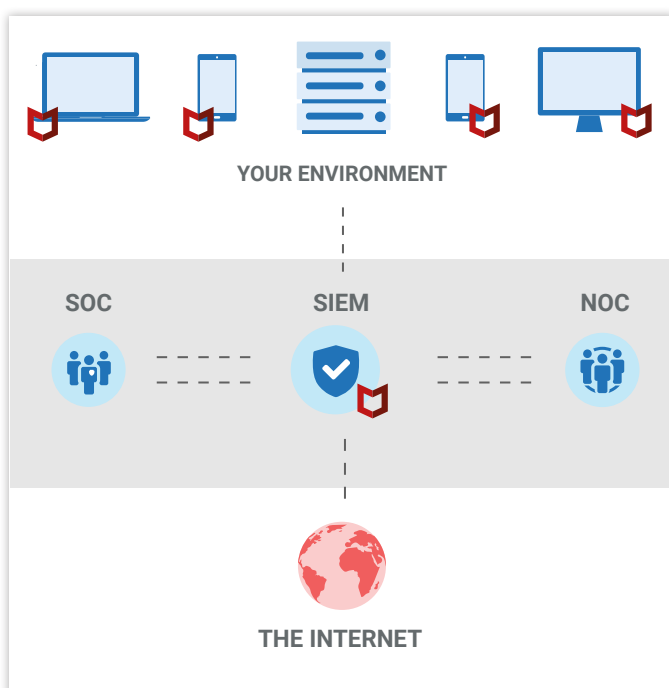

MONTHLY REPORTS

Automatically generated reports allow you to understand your security posture and threat vectors.

PRODUCT OVERVIEW

EZIT Endpoint provides an advanced, comprehensive threat detection and defence solution for an organization's computer endpoints (laptops, desktops and tablets). This fully monitored and managed solution allows organizations to improve their security posture by leveraging subject matter experts to correctly deploy, configure, maintain and respond to endpoint threats around the clock. The solution is powered by McAfee, a consistent leader in Gartner Magic Quadrant.

HOW IT WORKS

OUR TEAM AND PLATFORM

SECURITY INFORMATION & EVENT MANAGEMENT

Our SIEM system uses sophisticated machine learning to determine if a threat is taking place by analyzing security events within your environment for remediation.

SECURITY OPERATIONS CENTRE

A team comprised of security experts that fight advanced threats in near real time.

NETWORK OPERATIONS CENTRE

A team comprised of live agents who monitor all device and performance alerts within our customer's infrastructure.

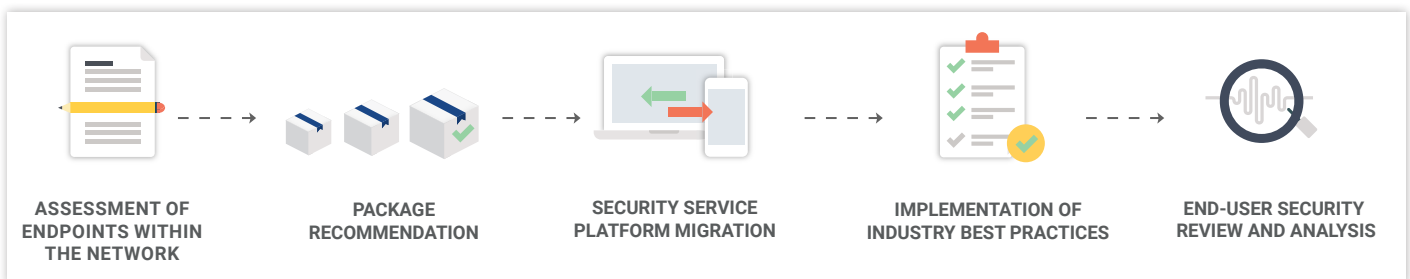

LEADING EDGE SOFTWARE

Includes antivirus, exploit prevention, desktop firewall, sandboxing, malware protection, application containment and integrated machine learning.

EZIT Endpoint

INTEGRATION

EZIT Endpoint is designed to rapidly deploy security services to your endpoints. We use industry best practices with out of the box security policies and processes that respond to daily changes in threat vectors that target endpoints. Our deployment team works hand in hand with your staff to assess, design and deploy the solution to deliver advanced security services from day 1 with minimal impact to users.
